Dear Hiring Manager,

I'm very excited to submit my application today for a position of Python Django Developer for **ReadyTal**
I saw that you are a curated group of some of the fastest growing startups and tech companies in the country, and you are actively turning away more than 50% of companies that attempt to join. When I first started as a junior developer a few years ago, I desired to join a team with bright features like your **ReadyTal**. It should come as no surprise, then, that the moment I saw this job posting, on Linkedin Vertex Solutions I dropped everything I was doing to apply.

I enrolled in a full-time course named Microverse to learn more about pair programming and doing real-world projects in a limited time. I've completed various projects with ReactJS, Redux, and Ruby on Rails. It's been 8 months since I started studying web development in this course. I still take every opportunity to continue to improve my skills, especially technical ones.

After I completed the microverse Core Curriculum started building Django projects such as e-commerce, booking doctor, and booking hotel API. Using Python, Django, Django rest Framework, Pytest for automated integration test, Djoser for user Authentication and Authorization, Redis, Celery, Swagger, Django debug tools, Docker, CI/CD, Heroku, and Fly. I also built a UI for those backend APIs using React and Redux, a redux toolkit.

I believe that my soft skills such as pair-programming, code reviewing, communication skills, and problem-solving with people who have different backgrounds, help me to quickly adapt to any new environment, and be part of that at a reasonable level.

I would be very glad to contribute to the **ReadyTal** team with my skills and creativity. I'm aware that writing tests are crucial to maintaining code quality. Since I have experience working with people of different cultures and backgrounds I will be a great team member for a multinational company that supports and takes an active part in its workers' development. That's why I'd be a great team member since you are a multinational company open to people who are willing to learn.
I'm very excited about the possibility of working for **ReadyTal**, and Please, don't hesitate to get in touch and schedule an interview if my skills and expertise interest you.

I look forward to hearing from you soon,

F.S.HIDIR
